# Zachary R. McKee

2566 Chasewood Court, Aurora, IL 60502 | (630) 805-3042 | <u>zmckee@hawk.iit.edu</u> http://ZacharyRMcKee.com | https://www.linkedin.com/in/ZacharyRMcKee/

## **Objective**

Aspiring software developer with solid knowledge of computer science fundamentals seeking a summer 2018 internship position to apply current skills and develop new ones while creating clean, practical and robust code.

## Education

B.S. Computer Science | 2016-2019 | Illinois Institute of Technology

Major GPA: 4.0 Overall GPA: 3.81

## **Relevant Courses:**

- Data Structures & Algorithms
- Computer Organization and

Assembly Language Programming

- Database Organization

## Technical Skills

Programming Languages

C, Python, Java, Haskell

**Database Tools** 

Oracle SQL, PL/SQL, PostgreSQL

- Discrete Structures

- Systems Programming
- Programming Paradigms/Patterns
- Object Oriented Programming

Front-end Technologies

HTML/CSS

**Development Tools** 

Git, Vim, Eclipse, Visual Studio, Linux

## **Experience**

Teaching Assistant | Illinois Institute of Technology | Fall 2017

Course: Computer Organization & Assembly Language Programming

Responsible for assisting students during lab sessions, holding office hours, answering student inquiries on Piazza, and grading assignments.

## **Projects**

## PiAlert (MHacks X)

https://devpost.com/software/pialert
Home security system built using a
Raspberry Pi, optimized for affordability
and ease of use.

#### NoteMaker (Boilermake V)

https://devpost.com/software/boilermakev Note-taking software that allows students to look up confusing terms incredibly quickly, using a sidebar that includes a summary of a relevant Wikipedia article.

#### Huffman Code Text Encoder/Decoder

http://zacharyrmckee.com/projects.html
Text file compression/decompression
application showcasing usage of trees,
hash tables, and general algorithm design.

#### LC-3 Simulator

Implements the instructions of the LC-3 assembly language. Effectively simulates a basic computer, complete with simulation of some hardware-level details (such as the program counter and loading instructions).
